## PROJECTS

- **Weather Forecast Website**

*Description* - I developed a straightforward weather website project that actively retrieves weather data and showcases it to users, ensuring they receive real-time weather updates.

*Technologies used* - HTML | CSS | JS

- **Book Store Management System**

*Description* - I have created a Book Store Management System with CRUD operations, enabling the users to add, read, edit, delete & store the book details through a seamless web interface.

*Technologies used* - Java | SpringBoot | MySQL

- **College Enquiry Chatbot**

*Description* - Developed the front-end interface for a chatbot that answers student queries by extracting keywords and matching them with a database to provide accurate response.

*Technologies used* - HTML | CSS | JS
